## More than real.

The compact background creates a uniform view with discreet tones, delicate colors, and minimal shading. Upon closer inspection, the texture is enriched with details that reproduce the original stone with extreme realism.

Il fondo compatto restituisce una visione d'insieme omogenea, con toni discreti, cromie delicate e stonalizzazioni minime. A una visione ravvicinata, la texture si arricchisce invece di dettagli riprodotti con estremo realismo che riproducono alla perfezione la superficie variegata della pietra di ispirazione.

Le fond compact donne une vue d'ensemble homogène, avec des tons discrets, des couleurs délicates et un effet dénuancé minimal. À y regarder de plus près, la texture s'enrichit de détails qui reproduisent la pierre d'inspiration avec un réalisme extrême.

Der kompakte Untergrund wird als einheitliche Oberfläche wahrgenommen, mit verhaltenen Nuancen, zarten Farben und minimalen Farbabweichungen. Aus der Nähe betrachtet bereichert sich die Textur hingegen um Details, die den als Vorbild dienenden Stein mit extremem Realismus wiedergeben.

El fondo compacto ofrece una visión de conjunto homogénea, con tonos discretos, colores delicados y contrastes mínimos. Si se observa con detenimiento, la textura se enriquece con detalles que reproducen la piedra fuente de inspiración con un realismo extremo.

Плотную поверхность плитки характеризуют неброская окраска и легкий разнотон, но в целом она дарит ощущение приятной однородности. При рассмотрении с близкого расстояния можно разглядеть детали, которые с предельным реализмом отражают рисунок исходного образца камня.

OVERVIEW &gt;

The 120x278 format is ideal for cladding walls all the way to the ceiling in a large commercial space and reducing the number of joints. The combination of the stone effect with other surfaces, such as the concrete or marble effect, generates a pleasant contrast of materials and styles.

Il formato 120x278 è ideale per rivestire pareti a tutta altezza in un ampio spazio commerciale e ridurre il numero delle fughe. L'abbinabilità dell'effetto pietra ad altre superfici, come l'effetto cemento o marmo, genera un piacevole contrasto materico e stilistico.

Le format 120x278 est idéal pour couvrir les murs toute hauteur d'un grand espace commercial et réduire le nombre de joints. La combinaison de l'effet pierre avec d'autres surfaces, telles que l'effet béton ou marbre, génère un agréable contraste de matière et de style.

Das Format 120x278 ist ideal, um Wände in einem großen Verkaufslokal raumhoch zu verkleiden und die Anzahl der Fugen zu reduzieren. Die Kombinierbarkeit der Steinoptik mit anderen Oberflächen wie Zement- oder Marmoroptik erzeugt einen ansprechenden stofflich-stilistischen Kontrast.

El tamaño 120x278 es ideal para cubrir paredes de altura completa en un gran espacio comercial y reducir el número de juntas. La posibilidad de combinar el efecto piedra con otras superficies, como el cemento o el mármol, crea un agradable contraste material y estilístico.

Форматом 120x278 можно покрыть стены торгового интерьера на всю высоту с вытекающей из этого минимизацией количества швов. Сочетание фактуры камня с другими рисунками, например, мрамора и цемента, рождает приятный контраст материалов и стилей.

# The evolution of ceramic surfaces.

The constant research of Atlas Concorde Laboratories has led to the creation of Sensitech, the porcelain tile surface made using a production method patented in Italy. Sensitech is a high-tech surface for interiors that combines high slip resistance with an unrivaled soft touch, which also makes it resistant to dirt and easier to clean. With Sensitech the meaning of surface evolves and takes on a reassuring, protective, and pleasantly refined touch, making architectural spaces increasingly comfortable and appealing.

La recherche constante des Laboratoires Atlas Concorde a créé Sensitech, la surface en grès cérame pour intérieur réalisée avec un procédé de fabrication breveté en Italie. Une surface à haut coefficient technologique pour les espaces intérieurs, en mesure de conjurer de hautes performances de résistance à la glisse avec une douce tactile inédite, qui la rend également résistante aux salissures et plus facile à nettoyer. Avec Sensitech, c'est l'acception même d'une surface qui évolue en offrant une caractéristique rassurante, protectrice et agréablement raffinée, qui rend les espaces architecturaux de plus en plus confortables et agréables à vivre.

De la constante investigación de los Laboratorios Atlas Concorde nace Sensitech, la superficie de gres porcelánico para interiores realizada con un método de producción patentado en Italia. Una superficie de alto coeficiente tecnológico capaz de combinar un alto rendimiento de resistencia al deslizamiento con una suavidad táctil sin precedentes, que además la vuelve resistente a la suciedad y más fácil de limpiar. Con Sensitech, el significado de la superficie evoluciona y adquiere un toque tranquilizador, protector y agradablemente refinado, haciendo que los espacios arquitectónicos sean cada vez más cómodos y satisfactorios.
